

I am writing to record my opinion and to urge you to reject petition 04-160, which would limit or prohibit satellite radio stations from broadcasting local weather and traffic information. This service has been tremendously helpful, and one of the reasons I have subscribed to the satellite radio services. I feel it is an infringement on my rights as a consumer not to be able to benefit from a service that I am paying for. It should not be illegal for satellite radio stations to provide this service, in my opinion. Please reject the National Association of Broadcasters' petition to terminate this service. Respectfully,
Mark Liponis, M.D.
